

PUBLIC BETA FOR IPHONE

Thank you for testing.

Check how naturally you can note your state in the morning, choose three areas for your Day Budget, and notice change in the evening. You can skip days without penalties or resetting your history.

BUILD**Current version**

Build 0.1 (2). Public beta on TestFlight.

SYSTEM**iPhone and iOS**

The minimum iOS version is shown on the TestFlight page.

Open with the iPhone camera to continue to the public beta in TestFlight.

WHAT TO TEST

Complete the full journey.

Complete one day from the morning check-in to the evening reflection, then see how the entry appears in your history.

01

Note your state

Choose energy, mood, bodily sensations, and direction of attention. Check whether each phrase is clear.

02

Choose your Day Budget

This is neither a task list nor a limit. Choose three areas you want to give attention to today.

03

Complete the day

In the evening, note what changed and where your attention actually went.

04

View the Orbit

Confirm that the day appears in the calendar and personal Orbit, and that a missed day does not feel like an error.

HOW TO SEND FEEDBACK

Tell us what happened.

Use the bot for impressions and ideas. For crashes and technical errors, TestFlight's built-in feedback is more useful.

BUG

IMPRESSION

IDEA

SECURITY

01

Add context

Include your iPhone model, iOS version, and app build. Describe the steps: what you did, what you expected, and what you saw. A screenshot or short screen recording can help reproduce the problem.

OPEN

Do not send one-time codes, passwords, tokens, or the contents of private entries.

SECURITY AND PRIVACY

Protect personal data first.

A working copy of your history is available on the iPhone offline. After sign-in, data synchronizes with your account. The app has no advertising or third-party analytics.

IMPORTANT

Check attachments

Before sending a screenshot or video, hide names, addresses, private entries, and any other data that is not needed to investigate the report.
